

e-skierowanie

**Convenience. Saved time.
Greater security**

How does the e-referral work?

1 The doctor will issue an e-referral

2 You will receive information about the e-referral

By SMS
with a 4-digit access
code or by e-mail

with the e-referral
attached as a PDF

And if you don't use the
Patient's Online Account,
the doctor will give you
a printout

3 Sign up for medical services based on
the e-referral

- by phone - provide a **4-digit code** and your **personal ID No. (PESEL)** (you no longer need to provide a referral in person, this is especially important for those who do not have a support from their families or for people with reduced mobility)
- in person - provide the **4-digit code** with **PESEL number** or present the printout or e-referral information on the screen of your telephone. In a facility equipped with a reader, a barcode is enough to download the e-referral

Check where you can receive and process the e-referral:
pacjent.gov.pl/gdzie-zrealizujesz-e-skierowanie

What to do to get referrals by e-mail or SMS

1 Enter pacjent.gov.pl and click „Log in”

2 Choose how you sign in, for example:

- **trusted profile (PZ)**
- **e-ID**
- **through your bank transaction system**
– check if your bank already offers this option

3

You are on your Patient Online Account.
Click „My Account”

4

Enter your **phone number or e-mail address**

5

Click „save” – and that's it!

It's a good idea to have a trusted profile.

It is your electronic signature, with which you can handle many official matters online

Create a trusted profile!

It's easy. You can:

- set it up online through the bank (a list of banks where you can do it can be found at pz.gov.pl)
- register on the pz.gov.pl, website, and then confirm your PZ in each branch of the National Health Fund, in the commune office, in the tax office or in another facility marked with a trusted profile sign

The list of points confirming trusted profiles can be found at pz.gov.pl

What does e-referral look like?

The e-referral access code is a **4-digit code**

The patient can receive it by SMS or e-mail. To sign up for the service, the patient provides this code and PESEL number

If the referral is to be carried out as traditional, a **handwritten signature** of the doctor is required

Important! Then you have **14 days** from signing-up to provide the original copy of the referral
